VERDICT • LEVEL 3 OF 4

Verify Before Purchase

Do not place a large order — resolve the listed items first. Re-submit for an updated review once resolved.

The single most important risk

The operative risk is that a buyer purchasing Bosch products through TD SYNEX for resale on Amazon in the US market may lack the Bosch-issued authorization required to list and sell without facing listing removal, account suspension, or legal action from Bosch — outcomes Bosch's own documented enforcement posture makes plausible. This risk is resolvable before commitment: TD SYNEX can either produce a current Bosch authorization covering the US Amazon channel or cannot. A secondary, narrower risk applies to Lenovo if any units are refurbished or intended for Amazon Renewed listing, where Lenovo's documented restrictions on non-authorized used dealers could create listing exposure. The Documentation Review dimension was not assessed in this evaluation — no transaction paperwork, invoices, or supply chain documents were available for review, and that limitation applies to both brands.

02 Assessment findings

Assessment area	Certainty
Supplier Legitimacy	Verified
Supply-Chain Relationship	Verified
Brand Risk	Verified
Documentation Review	Not assessed
Sourcing Logic	Informational

Supplier Legitimacy

Verified

TD SYNnex is a large, publicly traded (NYSE: SNX), investment-grade-rated IT distributor with decades of operating history (incorporated 2003 as SYNnex Corp). Evidence across government registrations, SEC filings, BBB profiles, LinkedIn, Fitch ratings, and its own website consistently confirms it as a real, legitimate, large-scale operating business. The domain tdsynnex.com dates to the 2021 merger rebrand and is now ~5.3 years old. The only negative signals are a low-volume Trustpilot score (weak signal given company scale) and third-party recruitment fraud impersonation — the latter concerns scammers posing AS TD SYNnex, not TD SYNnex itself. No evidence of registration fabrication, address fraud, website fraud, or vendor-perpetrated scams was found. Contact information (phone numbers, addresses) is consistent and verifiable across multiple independent sources.

Supply-Chain Relationship

Verified

LENOVO — CONFIRMED POSITIVES

- TD SYNnex is a directly authorized Lenovo distributor, confirmed across multiple geographies.
- TD SYNnex's own US portal explicitly uses the title 'Lenovo Authorized Distributor'. The UK Trusted Advisor portal identifies TD SYNnex as 'the UK's only Lenovo 360 Distributor'. The Belgium portal lists Lenovo as a distributed vendor with full program access.
- Official TD SYNnex press releases confirm an expanded distribution agreement for Mexico.
- Lenovo itself has recognized TD SYNnex as Global Distributor of the Year (2024) and US and UK&I Distributor of the Year (2025) at official Lenovo summits, and as Collaboration Partner of the Year at a TD SYNnex Vendor Summit.
- The relationship is active, current, and multi-regional.

REMAINING UNKNOWNNS

No specific gaps remain for Lenovo — the authorization is well-documented across US, UK, Belgium, and Mexico.

WHAT THOSE UNKNOWNNS DO NOT IMPLY

N/A for Lenovo; the relationship is strongly verified.

BOSCH — CONFIRMED POSITIVES

TD SYNnex Belgium's vendor listing page includes 'Bosch' among 200+ distributed brands, indicating some form of distribution relationship exists in the EU for at least one Bosch division.

REMAINING UNKNOWNNS

- The Bosch listing on TD SYNnex Belgium does not specify which Bosch division (Power Tools, Home Appliances, HVAC, Semiconductors, eBike, Motorsport, Sensortec, etc.) is covered.
- No Bosch-side source in the pack confirms TD SYNnex as an authorized distributor for any specific Bosch division in any geography.
- Bosch's own division-specific dealer and distributor locators (Power Tools, eBike, Home Appliances, Motorsport, Semiconductors, Sensortec, Professional Tools) do not reference TD SYNnex in the available evidence.
- The specific Bosch division, geographic scope, and authorization level for TD SYNnex remain unverified from the manufacturer's side.

WHAT THOSE UNKNOWNNS DO NOT IMPLY

- The absence of Bosch-side confirmation is not evidence of an unauthorized or grey-market relationship.
- TD SYNnex is a major global IT distributor and the Belgium listing suggests an existing commercial relationship.
- The unverified status for Bosch is a gap in publicly available evidence, not a negative finding about TD SYNnex, and carries no implication for the Lenovo relationship, which is independently and strongly verified.

Limits of this reading

Identity scope: Supplier legitimacy and identity verification are assessed separately (see the Supplier Identity findings); this analysis addresses the brand/supply-chain relationship only.

Authorization scope: This finding assesses the contractual and commercial authorization relationship between the vendor and the brand — whether the vendor is authorized, recognized, or connected as a source for the brand. It does not assess whether any specific online marketplace will approve resale.

Marketplace eligibility: A confirmed distributor or authorization relationship does not guarantee marketplace approval. Platforms such as Amazon, Walmart, and eBay apply seller-history, category, regional, and brand-specific review that cannot be verified by this analysis. Additional verification with the platform and brand may be required before purchasing inventory.

Brand Risk

Verified

CONFIRMED POSITIVES

For Lenovo — Lenovo operates a publicly promoted, structured reseller program and is recognized as actively targeting resellers in the B2B channel, confirming an affirmative reseller-friendly posture in its core channel. For Bosch — Bosch publishes a MAP policy that explicitly preserves retailer pricing freedom, and operates broad B2C distribution channels including third-party distributors, indicating resellers are part of Bosch's go-to-market in multiple product lines.

RISK SIGNALS FOUND — REQUIRING VERIFICATION

- For Lenovo — Seller forum posts allege Lenovo has an agreement with Amazon restricting used/renewed product resale to authorized dealers only, and some Renewed listings have reportedly been blocked.
- It is unverified whether this restriction applies to new product listings or only to used/renewed channels.
- Lenovo's DTC expansion is a directional signal worth monitoring but is not a confirmed reseller restriction.
- These signals require verification against Lenovo's current published channel policy and any Amazon Brand Registry or gating documentation from Lenovo directly.
- For Bosch — Bosch's sales policy reserves the right to limit distribution channels, and seller forum posts document a Bosch 'whitelist' of authorized sellers and regional restrictions blocking non-EU/UK sellers.
- A Reddit/ToolGuyd incident from September 2021 documents Bosch threatening legal action against an unauthorized reseller with a statement that Bosch 'has and will continue to file lawsuits against unauthorized resellers' — this event is outside the 24-month recency window and cannot be treated as a current confirmed enforcement action, but the stated ongoing intent warrants verification of whether more recent enforcement actions exist.

- The Amazon regional restriction messages may reflect Amazon-platform policy rather than Bosch-directed gating, and this distinction requires clarification.

WHAT THE UNKNOWNNS DO NOT IMPLY

- The absence of documented recent enforcement actions against resellers for Lenovo does not establish that resale is without risk — it reflects the limits of the evidence pack.
- Risk signals found for Bosch do not generalize to Lenovo, and vice versa; each brand's posture is assessed independently.
- The Bosch divestiture of its Building Technologies division creates uncertainty about channel policy for those specific product lines but does not characterize Bosch's posture across all product categories.

Limits of this reading

Marketplace eligibility: A confirmed distributor or authorization relationship does not guarantee marketplace approval. Platforms such as Amazon, Walmart, and eBay apply seller-history, category, regional, and brand-specific review that cannot be verified by this analysis. Additional verification with the platform and brand may be required before purchasing inventory.

03 What we could not confirm

The reading, and its limits

Verdict: Verify Before Purchase. TD SYNEX holds the strongest possible verified Lenovo distributor credential — US and UK&I Distributor of the Year 2025 and Global Distributor of the Year 2024, supported by a confirmed expanded distribution agreement. For new Lenovo products, the supply chain relationship is well-established. A narrower conditional gap exists for Lenovo: seller forum posts and Amazon Renewed blocking reports indicate Lenovo restricts used and renewed product sales on Amazon to authorized used dealers; whether this applies depends on the condition and category of the specific Lenovo units in this transaction, which has not been confirmed. For Bosch, the leading reading is that TD SYNEX's relationship is real but geographically scoped to Europe and has not been confirmed for US Amazon resale. The Belgium vendor listing is the only supply-chain link, and it is inferred. Every US-facing Bosch locator reviewed omits TD SYNEX. Bosch's published policy reserves channel restriction authority, and inferred evidence documents active enforcement against non-authorized Amazon resellers including threatened litigation and listing suspension. Absence from US locators is not itself evidence of wrongdoing or unauthorized sourcing, but it means no positive confirmation of US Amazon resale authorization exists in the record. This reading rests on Bosch authorization for US Amazon resale via TD SYNEX holding.

No.	What to monitor after purchase
01	Bosch enforcement actions against Amazon resellers, including new listing removal notices or legal filings targeting non-authorized sellers, which would indicate tightening of Bosch's Amazon channel policy.
02	Changes to Lenovo's Amazon Renewed or used-product authorization requirements, particularly any expansion of the categories or conditions subject to authorized-dealer-only restrictions.
03	TD SYNEX's Bosch relationship status on its US-facing vendor and partner pages, which currently do not reference Bosch and would be the first observable signal of a formalized US authorization.
04	Any Bosch policy updates to its MAP or channel restriction documents that alter the scope of authorized reseller requirements or Amazon-specific channel rules.

04 Verification checklist

Put these to the supplier before you commit. Satisfactory answers do not guarantee marketplace acceptance.

No.	Question to put to your supplier
01	Can you provide a current Bosch-issued authorized distributor agreement or authorization letter confirming TD SYNnex's right to resell Bosch products in the US market?
02	Does your Bosch authorization, if it exists, explicitly cover resale through Amazon as a sales channel, and if so, which Bosch product divisions and categories does it include?
03	Are the Bosch products in this transaction new, refurbished, or used, and under what condition classification would they be listed on Amazon?
04	For the Lenovo products in this transaction, are any units intended for listing on Amazon Renewed or under a used/refurbished condition, and if so, can you confirm TD SYNnex holds authorization for that specific listing category?
05	Can you provide a current Lenovo-issued distributor agreement or authorization letter confirming the scope of products and channels covered by TD SYNnex's Lenovo distribution rights?
06	Which specific Bosch division(s) or product line(s) does TD SYNnex distribute (e.g., Power Tools, Home Appliances, HVAC, Semiconductors, eBike)?
07	Can TD SYNnex provide a manufacturer-issued distribution agreement, authorization letter, or partner portal confirmation from the relevant Bosch division confirming their authorized distributor status?
08	In which geographic markets does TD SYNnex hold its Bosch distribution authorization (e.g., Belgium only, broader EU, US, global)?
09	Is TD SYNnex listed on the relevant Bosch division's official authorized distributor or dealer locator (e.g., Bosch Professional Tools dealer search, Bosch Semiconductors distributor list)?
10	Does TD SYNnex have a dedicated Bosch vendor page on its US or global portal (similar to its Lenovo pages at tdsynnex.com/na/us/lenovo/), and if so, does it carry an 'Authorized Distributor' designation from Bosch?
11	Does Lenovo publish a current channel or reseller policy that specifies any restrictions on third-party Amazon sales of new (non-used) products?

No.	Question to put to your supplier
12	Has Lenovo issued any documented enforcement actions (C&Ds, IP complaints, or Amazon takedown requests) against third-party resellers of new Lenovo products within the last 24 months?
13	Is Lenovo's DTC expansion (as reported by Modern Retail) accompanied by any formal policy changes restricting third-party reseller access to Lenovo products?
14	Does Bosch publish a current, brand-side policy document confirming that only authorized sellers may list Bosch products on Amazon, and if so, which product categories does it cover?
15	Has Bosch issued any documented C&Ds or filed lawsuits against third-party resellers (not counterfeiters) within the last 24 months?
16	Are the Amazon regional restrictions on Bosch products (blocking non-EU/UK sellers) driven by a Bosch-directed gating policy or by Amazon's own platform compliance rules?
17	Following Bosch's divestiture of its Building Technologies security and communications division to Triton, what entity now controls channel and reseller policy for those product lines, and has that policy changed?

05 Scope, definitions & limits

Verified

Independently corroborated — multiple independent sources confirm this.

Assessed

We evaluated the available evidence and formed a view, but could not independently corroborate it. A reasoned read, not an independent confirmation.

Not assessed

We did not evaluate this area — for example, because no documents were provided. It neither raises nor lowers the verdict.

Category requirements

Selling these brands in their marketplace categories may require category approval or specific documentation before listing. This is a marketplace requirement independent of this report's verdict — confirm your category status before you commit.

This report reflects observable evidence available at the time of research. It is not a guarantee of marketplace approval, account safety, or brand action. The decision to purchase is yours.
